Testimonials

"The Cadillac of Deck Crawlers"

"It's like a Bionic Needle Scaler"

"Most user-friendly surface prep tool and a definite requirement on all of our foreman trucks, now everybody wants one!"

"There are many imitators and tools that try to be the best, but there is only (1) AURAND tool"

"Definitely a best friend for any swimming pool rehab job"

"Those Aurand tools remove just about anything from every surface OR should I say about everything from any hard surface"

▼ Pneumatic Tools

Pneumatic tools feature rotary type air motors, free from toggles, pistons, or reciprocating parts to eliminate vibration. Tools operate on 42 CFM, 70-100 PSI.

All tools available with dust collector
M-Series tools available with stand-up handles

ALL AURAND TOOLS FEATURE:

A lightweight, well-balanced tool designed and built for all position surface prep applications.

Tools available in multiple sizes and power sources (110V, 230V, and pneumatic).

The Cast Aluminum housings and hardened worm gear design provide a tough, durable tool that will ensure many years of service.

The patented, dual head cutter design offers almost twice the working area as competitors and nearly 4x with our extended models.

The adjustable depth shoe controls cutter contact and impact, while also protecting the base surface. This assures uniform cleaning action and maximizing cutter life.

Aurand's dual heads and depth shoe also create a unique triangular balance that offers minimum operator fatigue along with maximum control and productivity.

The dual head design symmetry allows the operator to get very close to any obstruction or wall in all directions, almost instantly.

Options Available for Aurand Tools.

Vacuum dust collection

Wire brushes

Carbide cutter for M-Series units

This is just a sampling of the jobs that the people in the industry are doing with Aurand Tools.

Where can you get **SO MUCH** from such a small investment?
